23 dingen die ze je niet vertellen over het kapitalisme Ha-Joon Chang 2011-05-11 Kritische analyse van vrijemarktdenken Er zijn misschien wat nadelen aan verbonden, maar er is eigenlijk geen alternatief voor de vrijemarkteconomie. We worden er toch ook allemaal beter van? Fout. Ha-Joon Chang, een van de meest gerespecteerde economen ter wereld, maakt in dit boek korte metten met de grootste mythes over de economie in het algemeen en het vrijemarktdenken in het bijzonder. Niet iedereen wordt rijker van marktwerking, duurbetaalde managers leveren niet per se betere prestaties en we leven niet in een postindustriële economie. Chang weet elk idee dat wij over economie hebben op zn kop te zetten. 23 dingen die ze je niet vertellen over het kapitalisme, boordevol informatie over geld, gelijkheid, vrijheid en hebzucht, laat zien dat de vrije markt veel verliezers kent en vaak leidt tot een inefficiënte manier van economie bedrijven. In dit prikkelende boek legt de auteur, die in de traditie staat van John Kenneth Galbraith and Joseph Stiglitz, uit hoe de economie echt werkt en waarom verstandig overheidsbeleid meestal tot betere resultaten leidt dan pure marktwerking.

Journal of the House of Representatives of the United States United States. Congress. House 2010 Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House".

Popular Science 2004-09 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Sleeping Beauties USA Bjoern Marek 2016-02-04 Sleeping Beauties USA honours rusted and forgotten automotive treasures that have been found parked alongside the highways of America, waiting to be discovered again. Rather than showcasing typically brilliant, highly rebuilt show queens, the book instead explores the transience and inherent beauty of a car's life, captured through stunning and evocative photography.

Lemon-Aid Used Cars and Trucks 2010-2011 Phil Edmonston 2010-05-11 "The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

14th International Conference on Computational Intelligence in Security for Information Systems and 12th International Conference on European Transnational Educational (CISIS 2021 and ICEUTE 2021) Juan José Gude Prego 2021-09-21 This book of Advances in Intelligent and Soft Computing contains accepted papers presented at CISIS 2021 and ICEUTE 2021, all conferences held in the beautiful and historic city of Bilbao (Spain), in September 2021. The aim of the 14th CISIS 2021 conference is to offer a meeting opportunity for academic and industry-related researchers belonging to the various, vast communities of computational intelligence, information security, and data mining. The need for intelligent, flexible behavior by large, complex systems, especially in mission-critical domains, is intended to be the catalyst and the aggregation stimulus for the overall event. After a through peer-review process, the CISIS 2021 International Program Committee selected 23 papers which are published in these conference proceedings achieving an acceptance rate of 40%. In this relevant edition, a special emphasis was put on the organization of special sessions. One special session is organized related to relevant topics as follows: building trust in ecosystems and ecosystem components. In the case of 12th ICEUTE 2021, the International Program Committee selected 17 papers, which are published in these conference proceedings. One special session is organized related to relevant topics as follows: sustainable personal goals: engaging students in their learning process. The selection of papers is extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the program committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the CISIS and ICEUTE conferences would not exist without their help.

Cars & Parts 1990

Creativity Unlimited Micael Dahlen 2010-03-19 Flying in the face of current thinking, this book suggests that we do not need to 'think outside the box' in our quest for creativity, rather we should rethink the way we look 'inside the box'. This idea will resonate only too well with those who have endeavoured to be creative by thinking outside that box, only to have their attempts scuppered

by the constraints of bureaucracy and organizational politics. Instead of fighting a losing battle, the author suggests that creativity should be worked at within the constraints of the organizational box, but that space needs to be grown and allowed to be shaken up. Only by experimenting, mutating and finding new directions can you uncover business paths that lead to success. The reader is encouraged not to free themselves from all their knowledge and experiences (the thinking outside the box method) but to use their knowledge and experience in new ways. The book is structured around three key steps: Expanding the box: so that the pieces of the puzzle in it can move around more freely Filling the box: with even more knowledge, and how to get these new pieces of the puzzle to connect with the existing ones Shaking the box: so that the pieces fall into new places and form new patterns. The book shows that anybody can be creative. The creative methods suggested in the book will be linked to real business examples from which techniques have been developed to help their implementation. Numerous exercises and 'eye-openers' form part of the practical implementation of Micael Dahlén's ideas. The book is framed by models and concepts of how creativity works (the creative process, the creative person and the creative result) and what its effects are.

Lemon-Aid New Cars and Trucks 2011 Phil Edmonston 2010-11-11 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Lemon-Aid New Cars and Trucks 2010 Phil Edmonston 2009-11-01 This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.

The Law of Armed Conflict and the Use of Force Frauke Lachenmann 2017-01-05 This volume brings together articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law, the definitive reference work on international law. It provides an invaluable resource for scholars, students, and practitioners of international humanitarian law, giving an accessible, thorough overview of all aspects of the field. Each article contains cross-references to related articles, and includes a carefully selected bibliography of the most important writings and primary materials as a guide to further reading. The Encyclopedia can be used by a wide range of readers. Experienced scholars and practitioners will find a wealth of information on areas that they do not already know well as well as in-depth treatments on every aspect of their specialist topics. Articles can also be set as readings for students on taught courses.

Industrial Applications of Evolutionary Algorithms Ernesto Sanchez 2012-01-28 "Industrial applications of evolutionary algorithms" is intended as a resource for both experienced users of evolutionary algorithms and researchers that are beginning to approach these fascinating optimization techniques. Experienced users will find interesting details of real-world problems, advice on solving issues related to fitness computation or modeling, and suggestions on how to set the appropriate parameters to reach optimal solutions. Beginners will find a thorough introduction to evolutionary computation, and a complete presentation of several classes of evolutionary algorithms exploited to solve different problems. Inside, scholars will find useful examples on how to fill the gap between purely theoretical examples and industrial problems. The collection of case studies presented is also extremely appealing for anyone interested in Evolutionary Computation, but without direct access to extensive technical literature on the subject. After the introduction, each chapter in the book presents a test case, and is organized so that it can be read independently from the rest: all the information needed to understand the problem and the approach is reported in each part. Chapters are grouped by three themes of particular interest for real-world applications, namely prototype-based validation, reliability and test generation. The authors hope that this volume will help to expose the flexibility and efficiency of evolutionary techniques, encouraging more companies to adopt them; and that, most of all, you will enjoy your reading.

Lemon-Aid New and Used Cars and Trucks 1990-2015 Phil Edmonston 2013-11-18 Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches.

Automotive Technology: A Systems Approach Jack Erjavec 2014-02-28 AUTOMOTIVE TECHNOLOGY: A SYSTEMS APPROACH - the leading authority on automotive theory, service, and repair - has been thoroughly updated to provide accurate, current information on the latest technology, industry trends, and state-of-the-art tools and techniques. This comprehensive text covers the full range of basic topics outlined by ASE, including engine repair, automatic transmissions, manual transmissions and transaxles, suspension and steering, brakes, electricity and electronics, heating and air conditioning, and engine performance. Now updated to reflect the latest ASE Education Foundation MAST standards, as well as cutting-edge hybrid and electric engines, this trusted text is an essential resource for aspiring and active technicians who want to succeed in the dynamic, rapidly evolving field of automotive service and repair. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Power in Concert Jennifer Mitzen 2013-09-10 How states cooperate in the absence of a sovereign power is a perennial question in international relations. With Power in Concert, Jennifer Mitzen argues that global governance is more than just the cooperation of states under anarchy: it is the formation and maintenance of collective intentions, or joint commitments among states to address problems together. The key mechanism through which these intentions are sustained is face-to-face diplomacy, which keeps states' obligations to one another salient and helps them solve problems on a day-to-day basis. Mitzen argues that the origins of this practice lie in the Concert of Europe, an informal agreement among five European states in the wake of the Napoleonic wars to reduce the possibility of recurrence, which first institutionalized the practice of jointly managing the balance of

power. Through the Concert's many successes, she shows that the words and actions of state leaders in public forums contributed to collective self-restraint and a commitment to problem solving—and at a time when communication was considerably more difficult than it is today. Despite the Concert's eventual breakdown, the practice it introduced—of face to face diplomacy as a mode of joint problem solving—survived and is the basis of global governance today.

Latent Variable Analysis and Signal Separation Vincent Vigneron 2010-09-27

This volume collects the papers presented at the 9th International Conference on Latent Variable Analysis and Signal Separation, LVA/ICA 2010. The conference was organized by INRIA, the French National Institute for Computer Science and Control, and was held in Saint-Malo, France, September 27–30, 2010, at the Palais du Grand Large.

Ten years after the first workshop on Independent Component Analysis (ICA) in Aussois, France, the series of ICA conferences has shown the liveliness of the community of theoreticians and practitioners working in this field. While ICA and blind signal separation have become mainstream topics, new approaches have emerged to solve problems involving signal mixtures or various other types of latent variables: semi-blind models, matrix factorization using sparse component analysis, non-negative matrix factorization, probabilistic latent semantic indexing, tensor decompositions, independent vector analysis, independent space analysis, and so on. To reflect this evolution towards more general latent variable analysis problems in signal processing, the ICA International Steering Committee decided to rename the 9th instance of the conference LVA/ICA. From more than a hundred submitted papers, 25 were accepted as oral presentations and 53 as poster presentations. The content of this volume follows the conference schedule, resulting in 14 chapters. The papers collected in this volume demonstrate that the research activity in the field continues to range from abstract concepts to the most concrete and applicable questions and considerations. Speech and audio, as well as biomedical applications, continue to carry the mass of the applications considered.

Allemaal andersdenkenden Gert Jan Hofstede 2014-02-17 Allemaal andersdenkenden is een van de invloedrijkste boeken van de afgelopen decennia. Het is een standaardwerk voor wie denkt over en werkt met cultuurverschillen: overheid en bedrijven, NGO's, studenten, reizigers en krantenlezers. Dit is de jongste, opnieuw herziene editie van Geert Hofstedes baanbrekende studie naar de manier waarop wij in ons denken, voelen en handelen beïnvloed worden door de cultuur waarin we zijn opgegroeid. De 'dimensies van Hofstede' hebben blijvend bijgedragen aan wederzijds begrip tussen mensen in bedrijven, organisaties en andere sociale systemen over de hele wereld. Van Allemaal andersdenkenden werden wereldwijd 500.000 exemplaren verkocht, in 21 talen.
