Frontiers in Enterprise Integration Li D. Xu 2020-10-29 Enterprise Information Systems (EIS) integrate and support business processes across functional boundaries in a supply chain environment, and have become increasingly popular over the last 15 years. In recent years, more and more enterprises world-wide have adopted EIS such as Enterprise Resource Planning (ERP) for running their businesses. Previously, information systems such as CAD, CAM, MRPII and CRM were widely used for partial functional integration within a business organization. With global operation, global supply chain, and fierce competition in place, there is a need for suitable EIS such as ERP, E-Business or E-Commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency, competency, and competitiveness. As a result, there is a growing demand for researching EIS to provide insights into challenges, issues, and solutions related to the design, implementation and management of EIS. The papers in Advances in Enterprise Information Systems were selected from two premier international conferences: the International Forum of Information Systems Frontiers—Xian International Symposium (IFISF), June 29-30, 2006, Xian, China and the IFIP TC 8.9 International Conference on Research and Practical Issues of Enterprise Information Systems (Confenis 2007), October 14-16, Beijing, China. Both events provided an excellent opportunity for EIS academicians and practitioners in the world to gather and exchange ideas, and present original research in their fields. Advances in Enterprise Information Systems will be invaluable to scientists, researchers and professionals in EIS.

Identiteit en diversiteit M. Verkuyten 2010 Identiteit is een centraal onderwerp in debatten over sociale cohesie, culturele diversiteit, integratie en wij-zijdenken. Verkuyten bekijkt identiteiten, etnische relaties en manieren om met culturele diversiteit om te gaan vanuit onze kennis over menselijk gedrag: wat mensen willen, waar ze behoefte aan hebben, hoe ze in de regel reageren. Het gaat om de betekenis van gedragswetenschappelijke benaderingen in het duiden van hedendaagse dilemma's binnen onze pluriforme samenleving. Daarbij komen vragen aan de orde als: waarom en wanneer plaatsen mensen zichzelf en anderen in sociale categorieën en met welke gevolgen? Wat zijn de psychologische achtergronden van positieve/negatieve relaties tussen groepen? Hoe ontstaan meervoudige identiteiten en hoe gaan we daarmee om? Hoe reageren mensen op stigmatisering en uitsluiting? Hoe kunnen we omgaan met etnisch-culturele diversiteit en groepstegenstellingen? Omdat de verwijzing naar cultuur(verschillen) niet specifiek genoeg is, neemt Verkuyten de maatschappelijke verhoudingen en posities in ogenschouw.
