Starting Points in Critical Language Pedagogy Graham V. Crookes 2022-01-01 Critical language pedagogy, also sometimes referred to as critical ELT, where English is the primary language involved, has a literature in which theoretical and specialized work has outstripped more practically-oriented material. Nevertheless, even practically-oriented publications in this area tend to address the experienced, well-resourced teacher, as opposed to those beginning in this area, or those without much professional support. With a view to helping prepare second language teachers to begin to engage with critical language pedagogy, the authors of this book start from areas of conventional L2 curriculum that teachers naturally use. Each chapter presents material pertinent to areas of language, language teaching and course delivery, starting from a fairly conventional perspective. It then attempts to explain how this conception can be extended drawing upon the ideas of critical (language) pedagogy and teachers' experiences. The authors' experience of working with teachers, who work under different circumstances, in teacher education courses and workshops form key elements of the book. Teachers' voices are also given adequate space so as to provide a comprehensive picture and situated understanding of critical language pedagogy. Dialogical engagement with the initial perspectives of beginning critical language pedagogy teachers who do not necessarily have a fully-worked out "critical philosophy of teaching" or those who wish to practice critical ELT is another feature of the book. Finally, to strengthen the practical orientation of the book, teaching strategies and extracts of materials and lesson plans are also provided.

Kleurenblind Trevor Noah 2017-02-21 Trevor Noahs bijzondere levensverhaal - van een arme jeugd onder de apartheid in Zuid-Afrika tot geliefde comedian en presentator van The Daily Show - begon met een misdaad: zijn geboorte. Hij werd, hoewel gemengde relaties verboden waren, geboren als zoon van een blanke Europese vader en een zwarte Xhosa-moeder, die voor de buitenwereld moest doen alsof ze zijn nanny was in de weinige momenten dat ze als gezin samen waren. Zijn briljante, excentrieke moeder speelde een hoofdrol in zijn leven: ze was komisch en diepgelovig (ze gingen zes dagen per week naar de kerk en op zondag zelfs drie keer), en hielp Trevor op zijn hobbelige weg naar wereldfaam. Trevors belevenissen zijn afwisselend bizar, gevoelig en hilarisch. Zo vertelt hij hoe ze rupsen aten als er geen geld was, hoe hij uit een auto werd geslingerd tijdens een poging tot kidnapping, en over tienerverliefdheden in een door huidskleur geobsedeerde maatschappij. Zijn verhalen schetsen een onvergetelijk portret van een jongen die opgroeit in een snel veranderende wereld, gewapend met een scherp gevoel voor humor en onvoorwaardelijke moederliefde.

Not Just Victims Sucheng Chan 2003 Not Just Victims contains twelve oral histories based on conversations with Cambodian community leaders in eight American cities -- Long Beach, Philadelphia, Washington, D.C., Seattle, Portland, Tacoma, and the Massachusetts towns of Fall River and Lowell. Unlike the dozens of autobiographies published by Cambodians that focus largely on their victimization, these narratives describe how Cambodian refugees have adapted to life in the United States. Sucheng Chan's extensive introduction provides a historical framework; she discusses the civil war (1970-75), the bloody Khmer Rouge revolution (1975-79), the border war during the Vietnamese occupation of Cambodia (1979-89), and the additional travails faced by those who escaped to holding camps in Thailand. The book also includes an essay on oral history and a substantial bibliography.

Plane Answers to Complex Questions Ronald Christensen 2002 This textbook provides a wide-ranging introduction to the use and theory of linear models for analyzing data. The author's emphasis is on providing a unified treatment of linear models, including analysis of variance models and regression models, based on projections, orthogonality, and other vector space ideas. Every chapter comes with numerous exercises and examples that make it ideal for a graduate-level course. All of the standard topics are covered in depth: ANOVA, estimation including Bayesian estimation, hypothesis testing, multiple comparisons,

regression analysis, and experimental design models. In addition, the book covers topics that are not usually treated at this level, but which are important in their own right: balanced incomplete block designs, testing for lack of fit, testing for independence, models with singular covariance matrices, variance component estimation, best linear and best linear unbiased prediction, collinearity, and variable selection. This new edition includes discussion of identifiability and its relationship to estimability, different approaches to the theories of testing parametric hypotheses and analysis of covariance, additional discussion of the geometry of least squares estimation and testing, new discussion of models for experiments with factorial treatment structures, and a new appendix on possible causes for getting test statistics that are so small as to be suspicious. Ronald Christensen is a Professor of Statistics at the University of New Mexico. He is a Fellow of the American Statistical Association and the Institute of Mathematical Statistics.

France and Women, 1789-1914 James McMillan 2002-01-08 France and Women, 1789-1914 is the first book to offer an authoritative account of women's history throughout the nineteenth century. James McMillan, author of the seminal work *Housewife or Harlot*, offers a major reinterpretation of the French past in relation to gender throughout these tumultuous decades of revolution and war. This book provides a challenging discussion of the factors which made French political culture so profoundly sexist and in particular, it shows that many of the myths about progress and emancipation associated with modernisation and the coming of mass politics do not stand up to close scrutiny. It also reveals the conservative nature of the republican left and of the ingrained belief throughout French society that women should remain within the domestic sphere. James McMillan considers the role played by French men and women in the politics, culture and society of their country throughout the 1800s.

Psychology and the Social Class Worldview Anne E. Noonan 2021-12-21 This unique textbook explores the complex topic of social class, explaining the many psychological nuances of class and classism in people's lives as subjective and phenomenological experiences. Social class can be a deeply personal, complicated topic that is often frustrating and uncomfortable to discuss, and as such has often been a blind spot in teaching and academic literature. For the first time, Noonan and Liu look to address this in one comprehensive text, using a combination of first-person narratives, academic approaches to class, and psychology's contributions to the subject. Across seven chapters, the book introduces a highly accessible theoretical model of the psychology of social class, Liu's own Social Class Worldview Model. Using vivid autobiographical texts to bring the theoretical model to life, the authors show how our worldviews develop through interactions with our social class and economic environment and provide a unique array of methods and skill sets to help incorporate the model into teaching. Each section of the book guides the reader through core concepts in the area, from socioeconomic factors, social structures, poverty, race, racism, White privilege, and White supremacy. Featuring activity suggestions, discussion questions, and writing prompts to help apply theory to real-life narratives, this is the ideal resource for students and instructors across psychology, sociology, health economics, and social work, as well as anyone taking courses on examining social class.

Heterogeneous Learning Environment and Language in L2 Ramanjaney K. Upadhyay 2020-05-27 This book explores heterogeneous heterogeneity in the Indian academic setting. Presenting a study on the performance of Bachelor of Engineering students from various parts of the county, it analyzes the subjects' language skills on the basis of selected sociolinguistic variables and examines the possible role/impact of using multiple

languages in the communicative setting described. In turn, the book investigates the differences between the way language is viewed in the Orient and in the Western world, and how, despite their differences, these views lead to similar language teaching methods in both worlds. It also highlights the limitations of current theories and frameworks in terms of accommodating modern methods of assessing language skills. Addressing socio-pragmatic issues in terms of English proficiency and language assessment, it is the first book to offer such a focused and detailed discussion of these varied but related issues, making it a valuable resource for all scholars and researchers working in the areas of socio-pragmatics, language assessment, and intercultural communication.

Democracy and the News Herbert J. Gans 2004-04 American democracy was founded on the belief that ultimate power rests in an informed citizenry. But that belief appears naive in an era when private corporations manipulate public policy and the individual citizen is dwarfed by agencies, special interest groups, and other organizations that have a firm grasp on real political and economic power. In *Democracy and the News*, one of America's most astute social critics explores the crucial link between a weakened news media and weakened democracy. Building on his 1979 classic media critique *Deciding What's News*, Herbert Gans shows how, with the advent of cable news networks, the internet, and a proliferation of other sources, the role of contemporary journalists has shrunk, as the audience for news moves away from major print and electronic media to smaller and smaller outlets. Gans argues that journalism also suffers from assembly-line modes of production, with the major product being publicity for the president and other top political officials, the very people citizens most distrust. In such an environment, investigative journalism--which could offer citizens the information they need to make intelligent critical choices on a range of difficult issues--cannot flourish. But Gans offers incisive suggestions about what the news media can do to recapture its role in American society and what political and economic changes might move us closer to a true citizen's democracy. Touching on questions of critical national importance, *Democracy and the News* sheds new light on the vital importance of a healthy news media for a healthy democracy.
