Photobiology Elli Kohen 1995-08-16 Photobiology integrates a wide variety of scientific disciplines. As more people become aware of the many ways light interacts with chemical and biological systems, the need for a concise treatment of photobiology has become more critical. Kohen et al. Have written just such a book, intended both as a textbook and as a reference. The authors begin by providing a brief description of the nature of light, how it affects matter, and the means and methods of measuring it. A major section of the book is devoted to how light influences living systems, including discussions of photosynthesis, bioluminescence, regulatory mechanisms, and visual transduction of light. The last half of the book is devoted to the biomedical aspects of light, including photoimmunology, photoallergic reactions and other forms of light sensitivity, the optical properties of skin, and various ways that light can be used in therapy treatments. Useful to photobiologists as a comprehensive overview, this book should also appeal to biomedical researchers and advanced students of photobiology.

Gezonde huid van binnenuit Dr. Whitney Bowe 2019-01-11 In Gezonde huid van binnenuit laat Dr. Whitney Bowe zien dat een gezonde huid niet iets oppervlakkigs is. Ze legt op verhelderende en toegankelijke wijze uit dat het spectrum van huidandoeningen - van hardnekkige acne en rosacea tot psoriasis, eczeem en vroegtijdige veroudering - uitingen zijn van onregelmatigheden die hun oorsprong vinden in de darmen. Lasers, scalpels, crèmes en behandelplannen kunnen niet de gezonde, stralende huid garanderen die we allemaal willen hebben. Dr. Whitney Bowe richt zich daarom op het microbiom - de complete verzameling van micro organismen die op en in ons lichaam wonen en via de hersenen met de huid 'spreken' - en benadrukt het verband tussen slaap, stress, eetpatroon, de maag-darmgezondheid en de gezondheid van je huid. Gezonde huid van binnenuit bevat een eenvoudige uitleg van de wetenschap, praktische doe-het-zelf-huidverzorgingstips en een 21-daags programma dat je leven zal veranderen.
