Journey to Topaz Yoshiko Uchida 1971 After the Pearl Harbor attack an eleven-year-old Japanese-American girl and her family are forced to go to an aliens camp in Utah.

Jewel of the Desert Sandra C. Taylor 1993 In the spring of 1942, under the guise of "military necessity," the U.S. government evacuated 110,000 Japanese Americans from their homes on the West Coast. About 7,000 people from the San Francisco Bay Area--the vast majority of whom were American citizens--were moved to an assembly center at Tanforan Racetrack and then to a concentration camp in Topaz, Utah. Dubbed the "jewel of the desert," the camp remained in operation until October 1945. This compelling book tells the history of Japanese Americans of San Francisco and the Bay Area, and of their experiences of relocation and internment. Sandra C. Taylor first examines the lives of the Japanese Americans who settled in and around San Francisco near the end of the nineteenth century. As their numbers grew, so, too, did their sense of community. They were a people bound together not only by common values, history, and institutions, but also by their shared status as outsiders. Taylor looks particularly at how Japanese Americans kept their sense of community and self-worth alive in spite of the upheavals of internment. The author draws on interviews with fifty former Topaz residents, and on the archives of the War Relocation Authority and newspaper reports, to show how relocation and its aftermath shaped the lives of these Japanese Americans. Written at a time when the United States once again regards Japan as a threat, Taylor's study testifies to the ongoing effects of prejudice toward Americans whose face is also the face of "the enemy." A Revolution of Feeling Rachel Hewitt 2017-10-05 In the 1790s, Britain underwent what the politician Edmund Burke called 'the most important of all revolutions...a revolution in sentiments'. Inspired by the French Revolution, British radicals concocted new political worlds to enshrine healthier, more productive, human emotions and relationships. The Enlightenment's wildest hopes crested in the utopian projects of such optimists - including the young poet Samuel Taylor Coleridge, the philosophers William Godwin and Mary Wollstonecraft, the physician Thomas Beddoes and the first photographer Thomas Wedgwood - who sought to reform sex, education, commerce, politics and medicine by freeing desire from repressive constraints. But by the middle of the decade, the wind had changed. The French Revolution descended into bloody Terror and the British government quashed radical political activities. In the space of one decade, feverish optimism gave way to bleak disappointment, and changed the way we think about human need and longing. A Revolution of Feeling is a vivid and absorbing account of the dramatic end of the Enlightenment, the beginning of an emotional landscape preoccupied by guilt, sin, failure, resignation and repression, and the origins of our contemporary approach to feeling and desire. Above all, it is the story of the human cost of political change, of men and women consigned to the 'wrong side of history'. But although their revolutionary proposals collapsed, that failure resulted in its own cultural revolution - a revolution of feeling - the aftershocks of which are felt to the present day.

W-Sn Skarn Deposits and Related Metamorphic Skarns and Granitoids Teunis A. P. Kwak 1987 Intended as a reference for the academically-oriented geologist as well as the practising economic geologist, this book is concerned with the study of skarn deposits having anomalously high tin or tungsten contents, or both. Unlike many other books on economic geology, both economic W-Sn skarns and non-economic examples are covered, in order to enable the academically-oriented reader to grasp the full range of such deposits, and also to aid the economic geologist in distinguishing between W-Sn skarns having economic potential and those which do not. W-Sn skarns are notoriously complex, containing a wide range of textures, grain sizes, mineral assemblages, bulk compositions and structures. The lack of a sufficiently detailed data base, coupled with some unsupportable genetic models, has led to many misunderstandings and has often resulted in needless expenditure and effort on fruitless mineral exploration. Thus, the first aim of this book is simply to provide an adequate data base with sufficient references to enable an interested worker to define a skarn deposit and know where to find additional information on similar examples.

Belief about the Self Neil Feit 2008-07-24 This book offers a defense of the Property Theory of Content, according to which properties rather than propositions are the contents of our beliefs, desires, and other cognitive attitudes. New arguments for the theory are offered, objections are answered, and applications to problems in the philosophy of mind are discussed.

Undimmed Lustre Muriel Topaz 2002 Undimmed Lustre: The Life of Antony Tudor is a chronological biography of one of the most creative forces in dance of the 20th century. Born in 1908 in London, Tudor was raised in a lower middle class family on the streets of London's meat market district. Although he had no formal exposure to dance, he spent the first decade of his professional life as one of the founding members of the Ballet Rambert. In America, he became an all-important force and a prime mover in American Ballet Theatre for the most of its early history. His contributions to the development of the art of the classical ballet are inestimable, for he single-handedly introduced a new direction into the ballet world. Tudor imbued the simplest gesture with profound meaning, bringing drama into "academic" ballet, by mixing classical vocabulary, Freudian ideas, and Stanislavkian methodology and cinematic techniques into his dances. Tudor's enigmatic personality, his English propriety mixed with his rapier-sharp and often vulgar wit, his insecurities, and his total inability to compromise artistically, all made him a controversial figure in the very communal dance world. This book, written by Muriel Topaz, student, colleague, notator, assistant, and long time friend of Tudor's, reveals the misconceptions and contradictions that have attached themselves to the artist. Based on never-before seen personal archives, correspondence, and copious interviews as well as grant-supported research conducted in England, the United States, Sweden, Australia, Israel, Japan, and France, this work is a wonderful resource for dance teachers and students or anyone interested in classical ballet.

Water Mills of the Missouri Ozarks George G. Suggs 1990 In 19th and early 20th-century America, water mills were the center of the economic and social life of small communities throughout the nation's calm, rural backwaters, including the Missouri Ozarks.

Suggs (history, Southeast Missouri State U.) presents the stories of 20 Ozarks water mills, and Jake Wells illustrates the vignettes with drawings and watercolors. 91/4x61/4 Annotation copyrighted by Book News, Inc., Portland, OR

Hitchcock Nonetheless Marc Strauss 2007 Often glossed over by scholars and Hitchcock aficionados, the fifteen films in this book -- "Juno and the Paycock, The Skin Game, Waltzes from Vienna, Jamaica Inn, The Paradine Case, Under Capricorn, I Confess, Torn Curtain, Number 17, Rich and Strange, Secret Agent, Mr. and Mrs. Smith, Stage Fright, The Wrong Man," and "Topaz" -- are discussed and analyzed in detail, revealing the master's touch in many previously unheralded ways.
