Algoritmes aan de macht Hannah Fry 2018-12-11
Stel, je staat terecht. Wie laat je liever beslissen over je lot: een foutgevoelige want menselijke rechter of een algoritme zonder enige empathie? Stel, je koopt een zelfrijdende auto. Wil je dat die zo veel mogelijk levens redt bij een botsing, of dat hij

de eigen inzittenden bevoordeelt? Stel, een nieuwe machine heeft je medische gegevens nodig om kankerpatiënten te redden. Geef je je privacy op voor het algemeen belang? Algoritmes spelen een steeds grotere rol in ons leven. Op wat voor manier precies? En is het wel verstandig om belangrijke beslissingen zo klakkeloos aan ze uit te besteden? Wiskundige Hannah Fry gidst ons langs de dilemma's van ons nieuwe, geautomatiseerde bestaan.

Everyday Mathematics 2 Grade Teacher's Lesson Guide Volume 1 Max Bell 2004

De grit factor Angela Duckworth 2016-10-11

Waarom hebben getalenteerde mensen vaak moeite om hun doelen te bereiken terwijl minder begaafde individuen soms zonder slag of stoot verbazingwekkende prestaties leveren? Op basis van haar eigen verhaal als dochter van een wetenschapper die zich vaak beklaagde over haar vermeende gebrek aan intelligentie, beschrijft Angela Duckworth haar loopbaan door het onderwijs, de consultancybusiness en de neurowetenschap. Het leidde tot de hypothese dat werkelijk succes vooral ontstaat door een speciale mix van volledige overgave en de vastberadenheid om te werken aan je langetermijndoelen: grit. In dit boek doet Duckworth, winnaar van de prestigieuze

MacArthur Genius Award, haar theorie uit de doeken en helpt ze iedereen om aan de hand van zes kernwaarden hun eigen grit-factor te bepalen: hoop, inspanning, precisie, passie, rituelen en prioriteiten. Grit gaat voorbij aan clichés als ‘succes is vooral hard werken’ en biedt een frisse en motiverende manier om zelf ongekennde resultaten te behalen.

De telduivel Hans Magnus Enzensberger 2013-04-10 Wiskunde? Hou op zeg! Voor veel mensen is wiskunde een warboel van getallen, sommen en onbegrijpelijke berekeningen. Ook Robert, de jongen in de blauwe pyjama, moet er niks van hebben. Tot hij bezoek krijgt van een telduivel en twaalf nachten lang met getallen aan het goochelen is. Dan blijkt dat wiskunde een spannend en grappig spel is dat Robert en ook de lezers geen enkele moeite kost. Wiskunde is niet moeilijk. Zodra het telduiveltje met zijn toverstok zwaait, verdwijnt de angst voor getallen als sneeuw voor de zon.

Math Magic for Your Kids Scott Flansburg 1997-01-15 Learning math can be a difficult task for any child, and for many adults. But learning to work with numbers need not be a dreaded experience; in fact, it can even be fun! Scott Flansburg, also known as "the Human Calculator," can help kids learn how to add, subtract, multiply and divide without the anxiety and frustration which often accompanies learning these skills. Using techniques that make numbers easy to work with and by demonstrating how math is essential to everyday life (contrary to the lament of a great percentage of students), Math Magic for Your Kids can help maximize your child's potential to understand math and enjoy it in the process. Flansburg has helped millions of "math phobic" adults with his popular lectures and best-selling book, Math Magic. Now he is reaching out to help America's "math phobic" kids. Math Magic for Your Kids makes it easy, even for those adults who suffer from math anxiety, to help the next generation get a leg up on essential math skills. The book is specifically designed to be combined with various mathematics curricula approved by the National Council of Teachers of Mathematics. Aimed at

children aged 5 through 8, it can also benefit younger children who demonstrate a readiness for advanced number concepts and for older children who need reinforcement of basic math skills. For kids who struggle with simple math skills, Flansburg provides activities to "build a child's math sense" and help reinforce math concepts. Math Magic for Your Kids also contains information and anecdotes that relate math concepts to everyday situations, explains principles that facilitate learning in general, and provides shortcut methods as well as challenging puzzles and riddles to keep kids interested and involved. Games and exercises are designed to be executed independently or with parents' help.

De Formule Albert-Laszlo Barabasi 2018-11-15 In 'De formule' doet hoogleraar Albert-László Barabási

zijn baanbrekend onderzoek naar de principes achter succes uit de doeken. We hebben geleerd dat hard werken en je talenten benutten de sleutels tot succes zijn. Hoewel ons harde werk in de praktijk vaak onvoldoende erkenning of andere vormen van beloning oplevert, blijven we resoluut volharden in deze aanpak – we kennen immers geen andere. Barabási laat zien waarom dit niet werkt en wat succes werkelijk is, namelijk een netwerkeffect gebaseerd op de perceptie en waardering van de mensen om je heen. Respect en waardering blijken cruciaal te zijn voor de erkenning van jouw werk en voor je succes. Plat gezegd: je bent pas succesvol als genoeg mensen tegen elkaar zéggén dat jij succesvol bent. Met behulp van big data en vele casestudy's formuleerde Barabási principes die bepalen wie nu werkelijk vooruitkomt in de wereld en wie niet. In 'De formule' worden ze uitgelegd en beargumenteerd en leer je hoe je ze kunt gebruiken in je eigen leven.

virtually all disciplines. It also covers the trend of education innovation in many countries, with “education entrepreneurship” being the frequently used description. The 12 educators highlighted here are even more entrepreneurial than many businesspeople. Generally, schools are required to follow certain rules, especially the public schools. Accordingly, the book also describes how these education entrepreneurs have innovatively created a fostering environment under challenging constraints to facilitate the success of students, teachers, and even the local community. Six of the cases involve school-based innovation, while the other six focus on student-based innovation. Their stories provide valuable insights for all companies seeking to become more innovative in a resource-constrained setting.
